

OVERVIEW

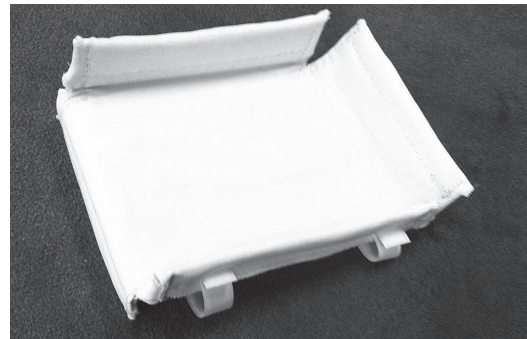

Buckeye Pads and Covers has numerous “miscellaneous” products that are used each day in the dry cleaning and laundry industry.

While not the typical press pads and covers, these items provide safety (Pluto Pipe Wrap, Aramid Hose Wrap, Steam Trap Shields, and Insulating Head Shields), protection (Iron Rests, Cool-Hand Poli-Sleeve Head Cleaning Mitts), and make daily tasks even easier. Iron Shoe Steam Diffusers, Aramid Head Covers, Hand Pads, Silicone Padding and Pre-Cut Flannel for cuff and collar presses are examples of items that are also available for you to market to your customer base.

These products allow you to generate additional profits with each and every order!

NOTES

[illegible]

BON-KNIT BUCK COVERS

Bon-Knit Buck Covers are to be used over existing buck pads.

Advantages of using Bon-Knit Buck Covers:

- 1) When the cover portion of a dry cleaning pad is worn but the padding is still resilient, a cover can be used to extend the life of the dry cleaning pad.
- 2) When the cover is heavily built up with starch, you can replace just the cover.
- 3) Cover can be removed for easy cleaning.

To order, look at the BONNCO index code number for PRO pads and use the letters BK in front of the BONNCO Index code numbers. For example, our BONNCO Index code number for our PRO pad for the Cissell AU-42 is PRO-840. Our BONNCO Index code number for the BON-KNIT Cover is BK-840.

PRO-KNIT BUCK COVERS

Pro-Knit Buck Covers are to be used over existing buck pads.

Advantages of using Pro-Knit Buck Covers:

- 1) When the cover portion of a dry cleaning pad is worn but the padding is still resilient, a cover can be used to extend the life of the dry cleaning pad.
- 2) When the cover is heavily built up with starch, you can replace just the cover.
- 3) Cover can be removed for easy cleaning.
- 4) Elimination of moiré patterns and seam impressions.

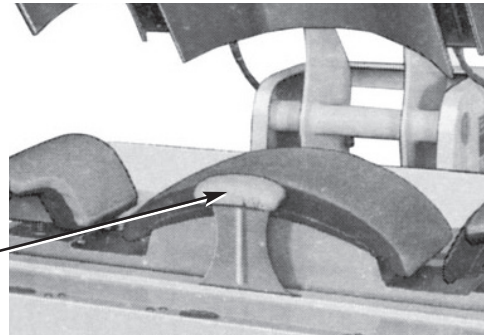

To order, look at the BONNCO index code number for PRO pads and use the letters PK in front of the BONNCO Index code numbers. For example, our BONNCO Index code number for our PRO pad for the Cissell AU-42 is PRO-840. Our BONNCO Index code number for the PRO-KNIT Cover is PK-840.

COOL HAND POLI-SLEEVE

Super-tough sleeve goes a long way toward protecting operators from burn injury. Unlike imitations, Bonn's Cool Hand covers the whole length of the operator's arm when cleaning press heads. The finest product available for protection!

- Made to last — constructed of heat-resistant, fully insulated fabric and synthetic abrasive cleaning material.
- Powerful cleaning — helps keep your laundry press heads clean and free of starch buildup, preventing stains and residue on clothing to insure the highest quality pressing.
- Serves as both a cleaner and polisher, without scratching the pressing surface.

HAND PAD

A must-have for every work station! Steam garments safely with consistent, exceptional results.

- Protects operator — provides optimum protection from painful burns during steam pressing.
- Durable construction — superior heat and wear resistance stands up to daily hard use.
- Uniform results — even surface helps produce a finish that will keep your customers satisfied and loyal.

ARAMID HEAD COVERS (HTH)

Our Bonn Aramid Heat-Resistant Head Cover (HTH) is used as a replacement cover on metal grid plates. This tailored three-dimensional Aramid cover will enhance the performance of worn or torn metal grid plates. The high heat resistant material will withstand the toughest of conditions. Its skirted type cover with rods and springs makes it easy to install.

Advantages of using Bonn Head Covers:

- 1) Buttons are protected from hot metal grid plate.
- 2) Nicks on metal grid plate will not be transferred to garments.
- 3) Helps to eliminate shine on garments.
- 4) Helps protect press operator from hot metal grid.

To order, look at the BONNCO index code number for Master Finish Head Pads (MFHP) and use the letters HTH in front of the BONNCO Index code numbers. For example, our BONNCO Index code number for our MFHP for the Cissell AU-42 is MFHP-21. Our BONNCO Index code number for our Aramid Head Cover for the Cissell AU-42 is HTH-21.

INSULATED HEAD SHIELDS

FH Bonn has partnered with Lab Test to bring you patented Insulated Head and Buck covers for your Dry Cleaning Presses as well as Insulated Covers for all Laundry Presses.

Advantages of using Insulated Head Shields:

- Maximizes efficiency of the Pressing Machine because the heat is contained on the pressing surface resulting in drier steam. This translates to better pressing and a higher quality finish.
- By covering all exposed surfaces, the risk of burns is greatly reduced.
- Will not radiate heat to compete with fans or air conditioning, thus saving energy.
- Creates a much better and safer working environment.

Manufacturer and Model Number required when ordering.

This item is a special order item and cannot be included with a stocking order.

IRON RESTS

Our new iron rests are made with a rigid aluminum plate construction and heat resistant aramid cover cloth w/ padding.

- Protects Irons from Falling
- Form fitting
- Protects iron shoes from damage
- Saves money

ADDITIONAL IRON RESTS

Protect your investment! This reliable design keeps the iron securely in place — and your iron shoe is safe from daily wear-and-tear.

- Eliminates damage — prevents costly iron shoe replacement caused by dropping or bumping on unprotected iron stands.
- Heavy-duty material — made from various heat-resistant fabrics.
- Assorted sizes — a variety of sizes fit most iron stands.
