

OVERVIEW

USE CTRL+F FUNCTION TO FAST SEARCH

Buckeye Pads & Covers is pleased to offer the following dry cleaning pads and head plates for your customers' consideration. Offering our pads and head plates in varying combinations provides your customer with an option for every finishing situation. All of our dry cleaning pads are made with the highest quality foam ... foam that will produce maximum steam and vacuum porosity, while standing up to the day to day abuse of pressing garments. In addition, all of our pads are cut oversize to guarantee a better fit, preventing slippage and movement on the press, once installed.

Red Pro-Finish 861 (RPRO)

Add a splash of color to your finishing operation! The Red Pro-Finish Premium dry cleaning pad from Buckeye Pads & Covers will deliver you from those drab boring dry cleaning press pads currently on the market. Manufactured with Buckeye Pads & Covers's exclusive Pro-finish 861 material, the Red Pro Premium dry cleaning press pad will give long life and provide a *quality* finish on a wide variety of fabrics.

Tan Pro-Finish 861 (PRO)

Buckeye Pads & Covers's Pro-Finish 861 Press Pad (PRO) is designed with today's fabrics in mind. The PRO Pad will help eliminate those frustrating moire' patterns and seam impressions that appear on the micro-fiber polyester and rayon type garments. The exclusive PRO finish cover fabric is made of an industrial grade micro-fiber material that is soft and smooth to the touch. As a result, the smooth weave will not transfer marks on to the garments being finished. Because of its construction, the PRO 861 material will stretch and move with the garments being pressed, eliminating fabric distortion. For that professional finish, the Pro-Finish 861 is the dry cleaning pad of choice.

Black Master Finish Head Plate (BMFHP)

Buckeye Pads & Covers's Black Master Finish Head Plate is a totally Premium alternative to traditional fabric grid plates. The BMFHP does not show dirt, stains or wear signs. This head plate looks just like new from the first day you use it, to the last day. The construction of the BMFHP, along with the Black Nylon cover material, will produce a clean crisp finish on a wide range of fabrics, while giving extended service life. Looks Fantastic when paired with our Red Pro Finish Dry Cleaning pad.

White Master Finish Head Plate (MFHP)

The Buckeye Pads & Covers Master Finish Head Plate (MFHP) combines a perforated aluminum grid with a polyester outer cover. It also contains a layer of 20 Oz. Nylon Flannel, located between the grid and cover. The flannel aids in the dispersion of steam. The multi-layered construction allows for a firm press, while the flannel provides resiliency when finishing lightweight delicate garments.
